

Lab Assignment

Problem Statement: Create one list using the code of Linked List Stack. Insert following data.

Data: 213, 345, 5,8756, 345,989, 34,977, 111, 555, 1067, 1234, 9845

Perform the searching on the list for the following queries:

- 1. 977**
- 2. 87**
- 3. 34**

Display “data found” if data found in the list else display “data not found”.

[create separate method search task]
